## Optimizing your Business Productivity Infrastructure

### What does it mean to "Optimize Your Business Productivity Infrastructure?"

Amplify the impact of your people with a business productivity infrastructure based on Microsoft solutions - a complete set of desktop and server software and services to help streamline the way you and your people do business while increasing IT effectiveness. Empower your people in a changing workplace with a unified infrastructure that simplifies the way your people communicate, share expertise, gain business insight and find information, all by using familiar 2007 Microsoft Office system applications that help you manage IT costs and complexity.
